

Garage Band

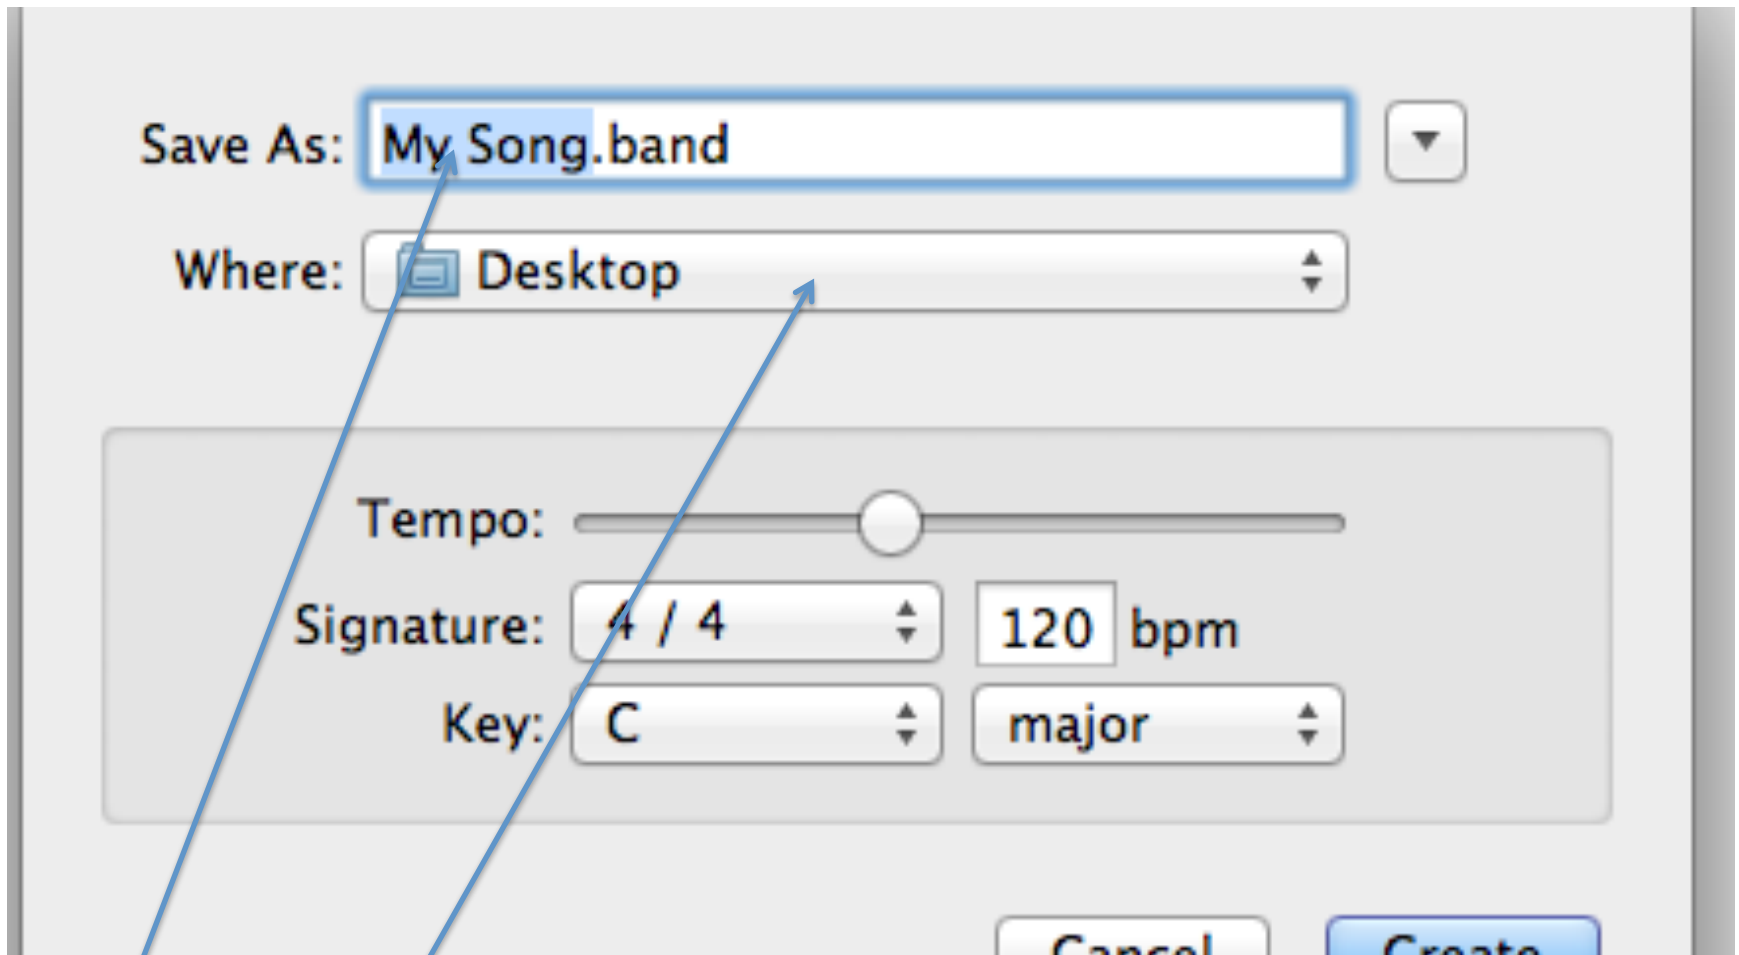

Basics

By Mr. Regier

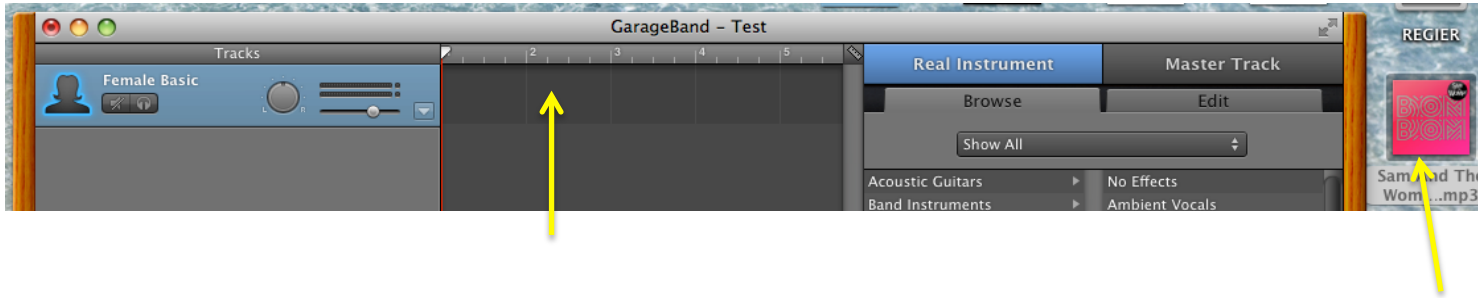

Open up Garage Band

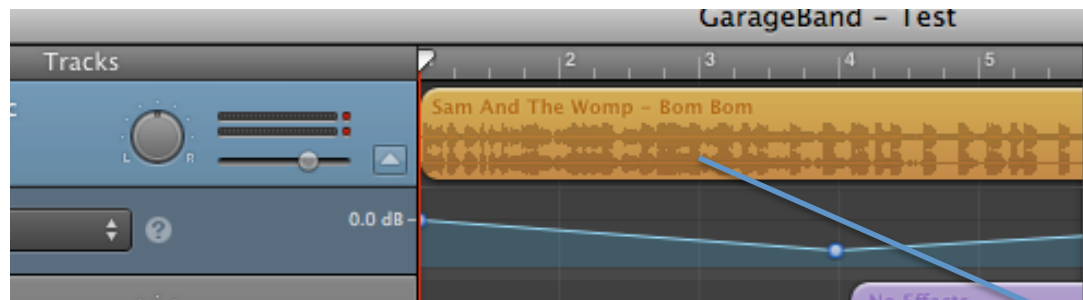

Give it an appropriate name
(to find later)

Drag track to edit

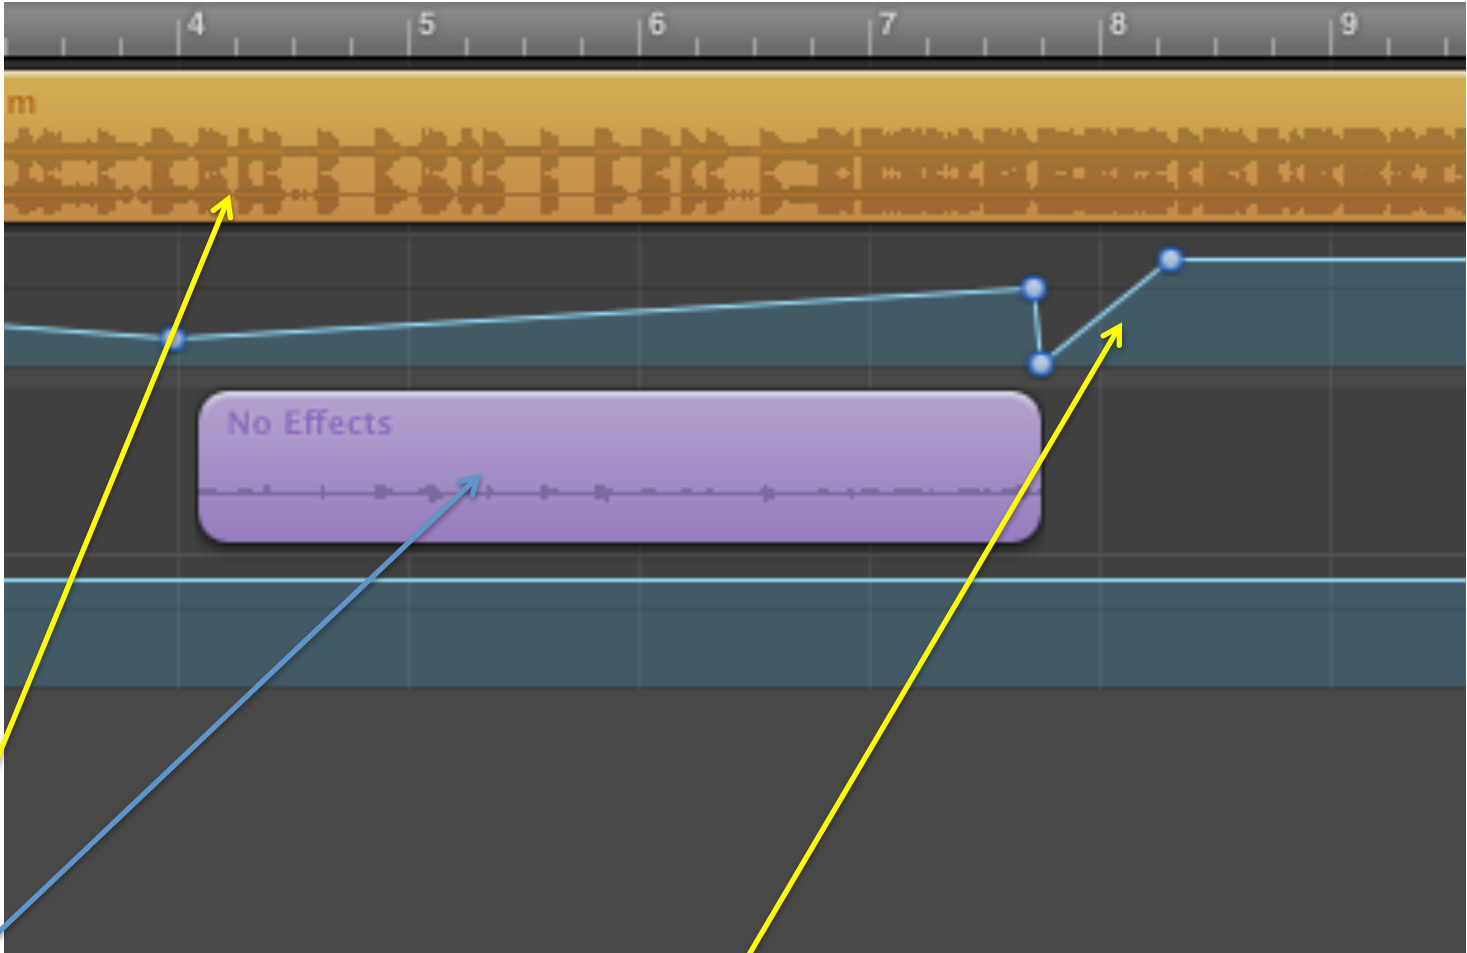

Drag Audio file

It will look like this

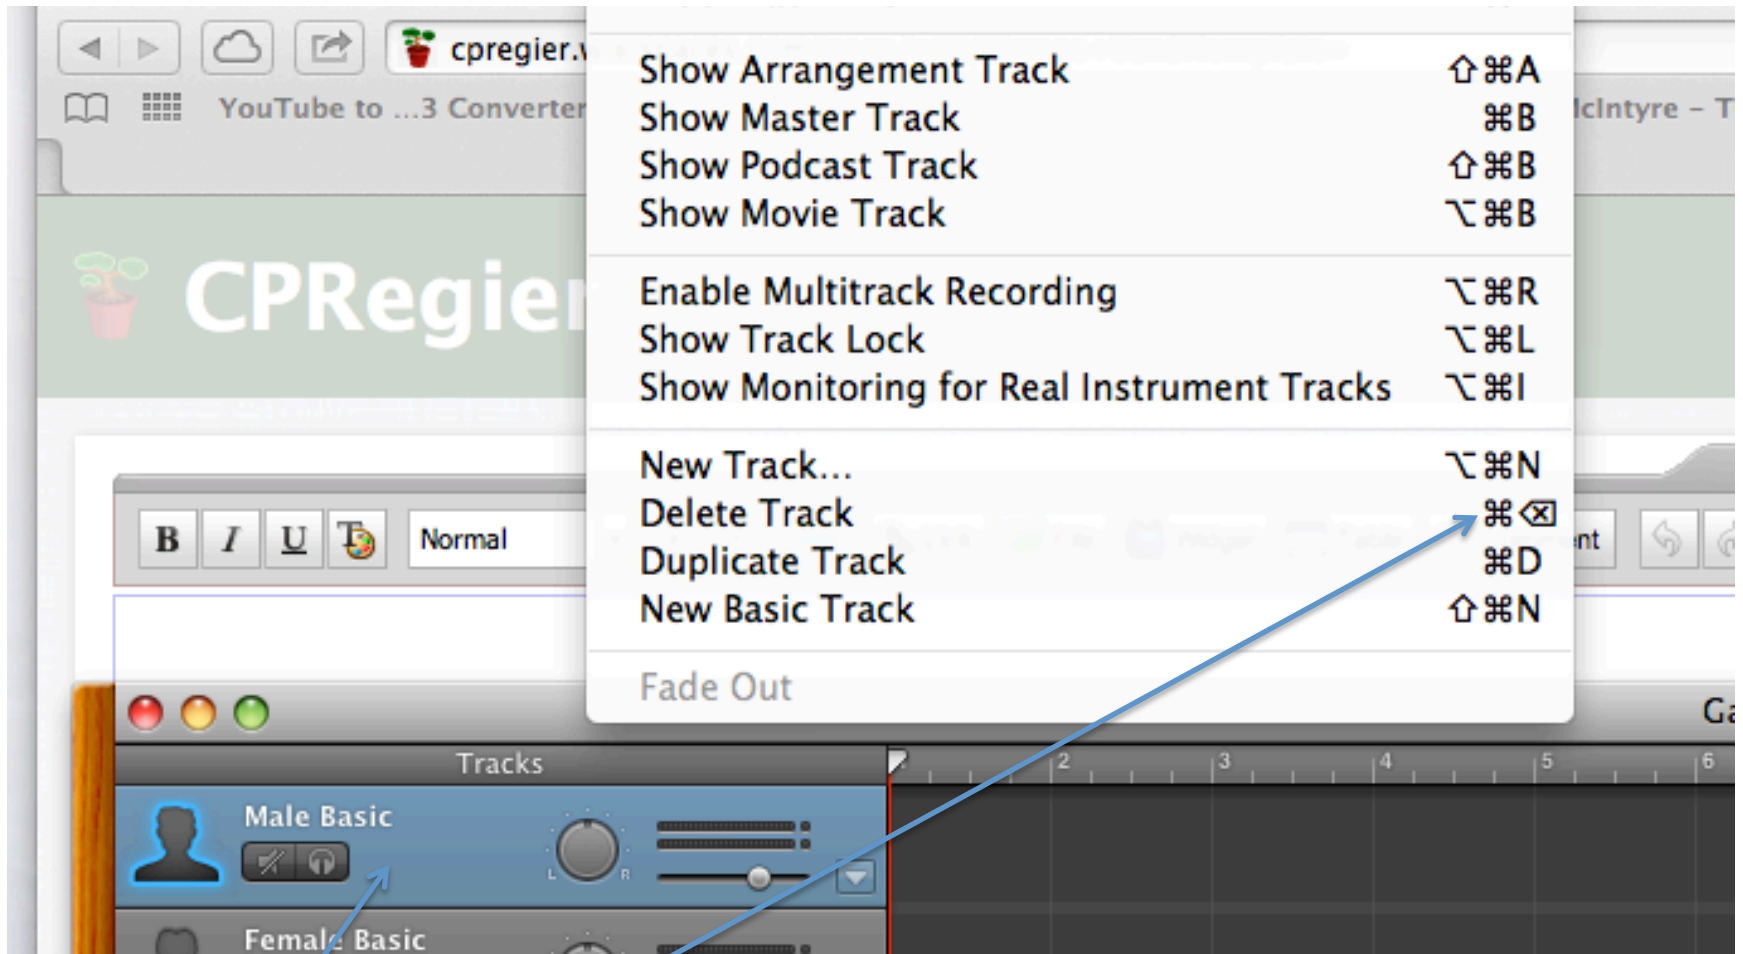

Multiple Tracks (adjustable Volume)

Multiple Tracks

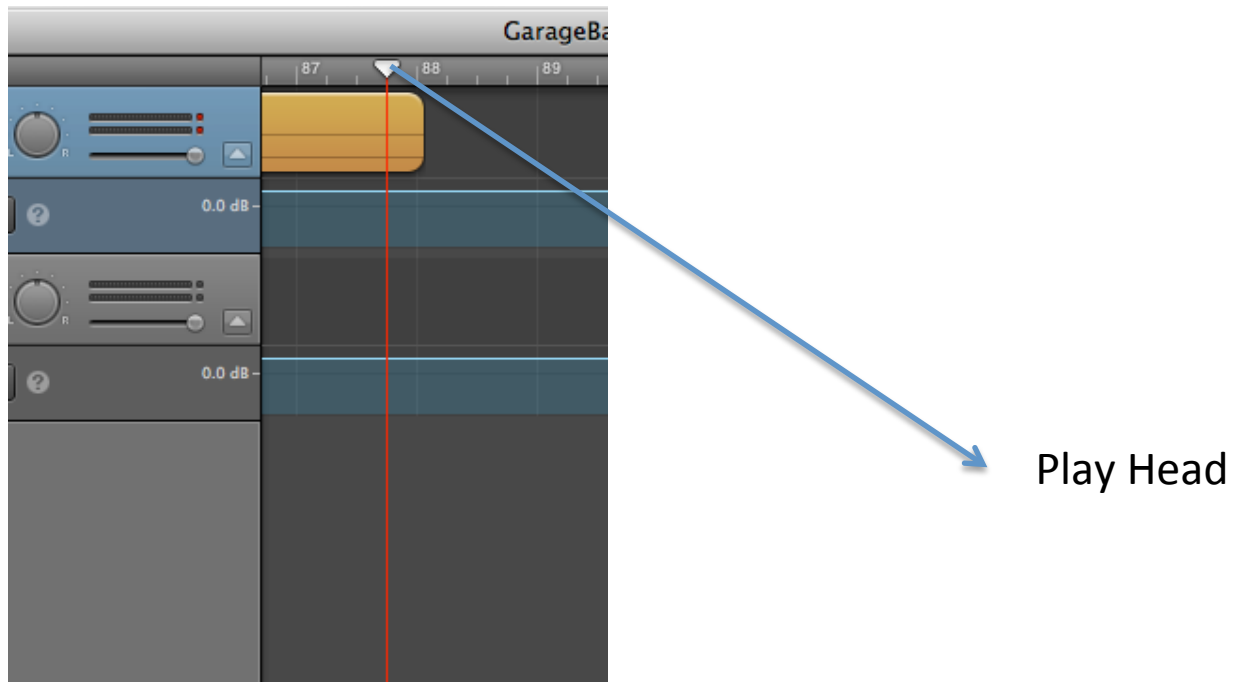

Adjust volume to maximize effect and clarity

Delete Multiple tracks

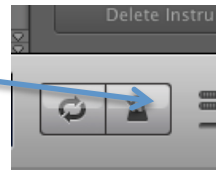

Use Space bar

- Space bar Stops and Starts Play head

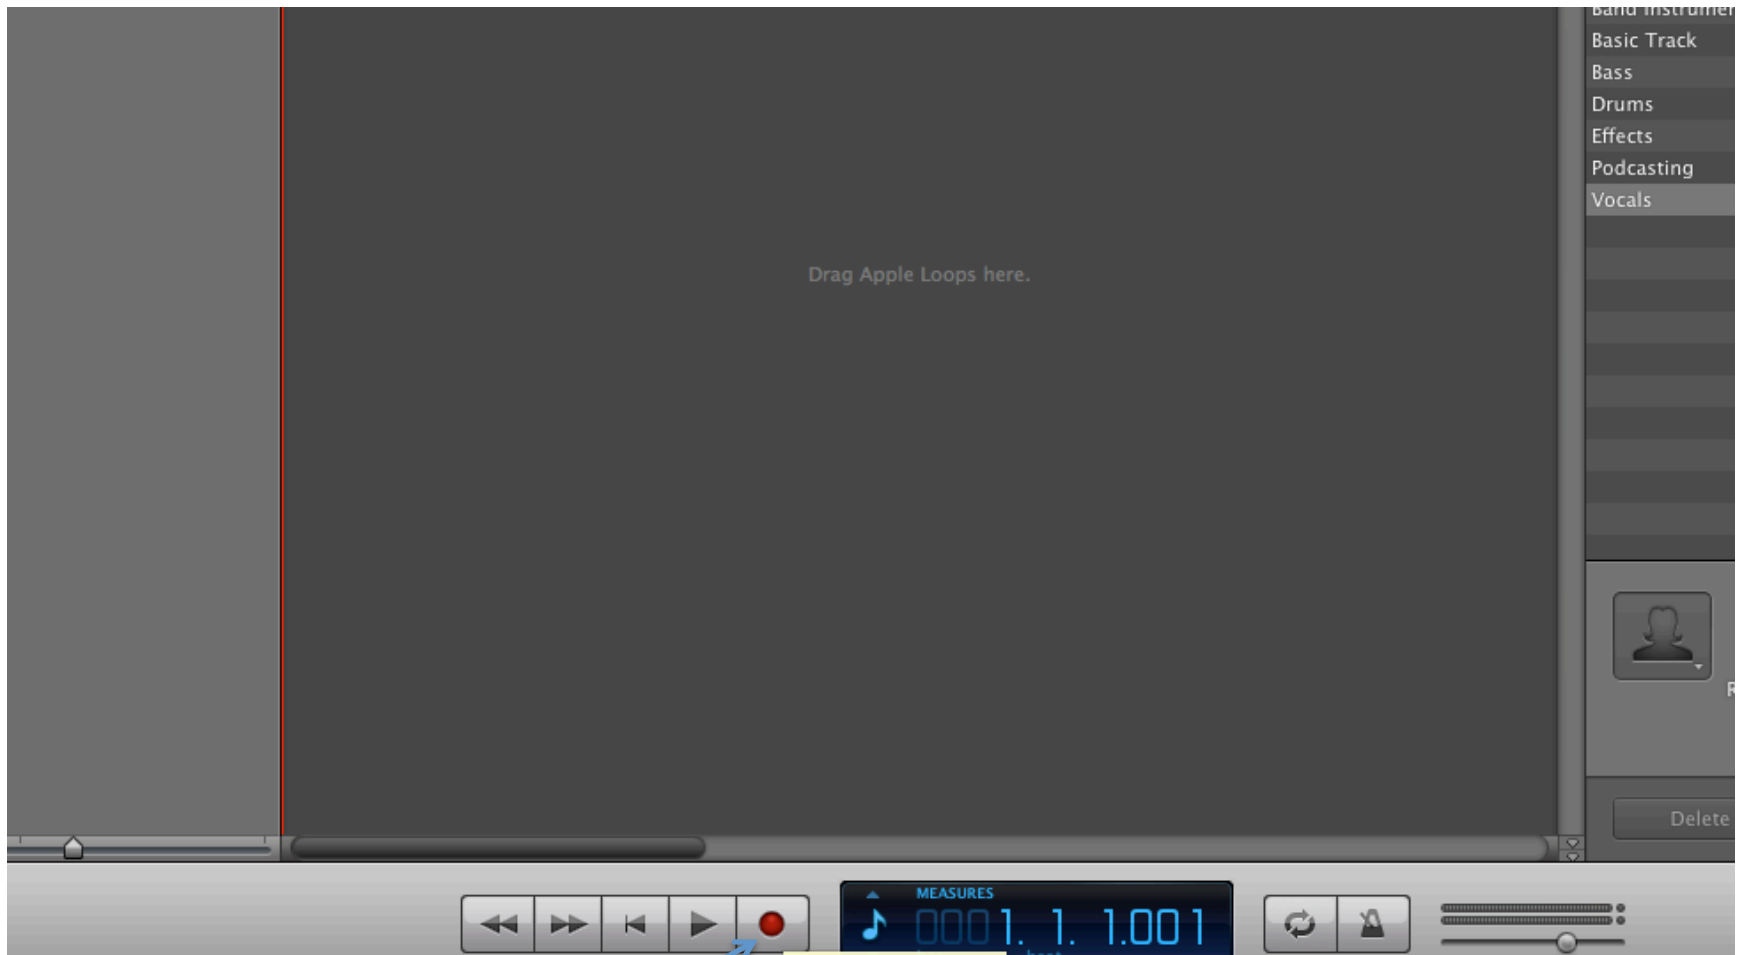

Metronome

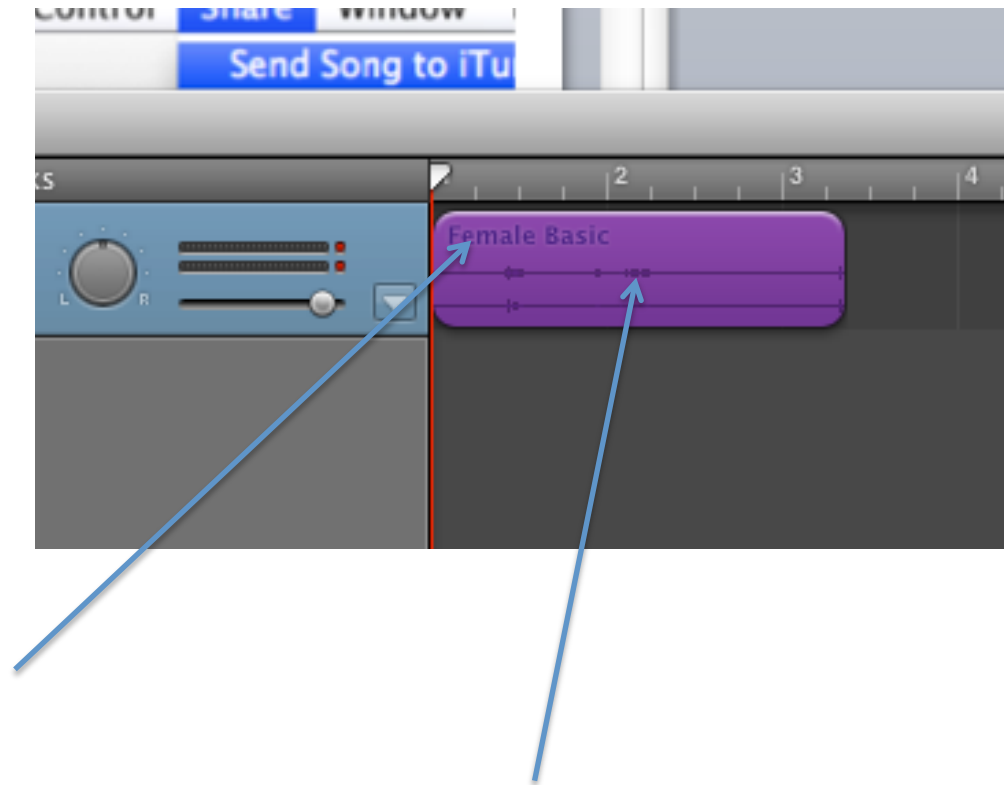

- GarageBand includes a metronome, which plays a steady beat to help you play and record in time.
- **To use the metronome:**
- To turn the metronome on or off, click the Metronome button, or choose Control > Metronome.

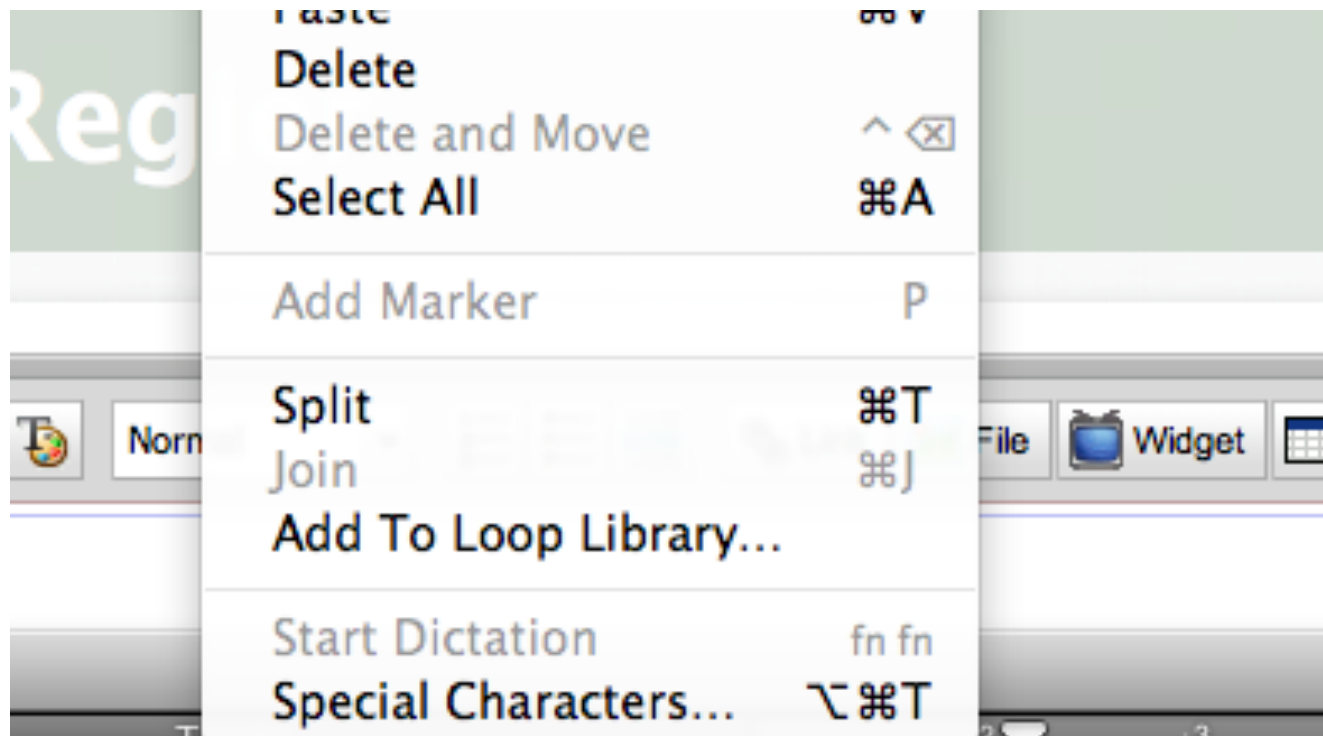

Time to test (start recording)

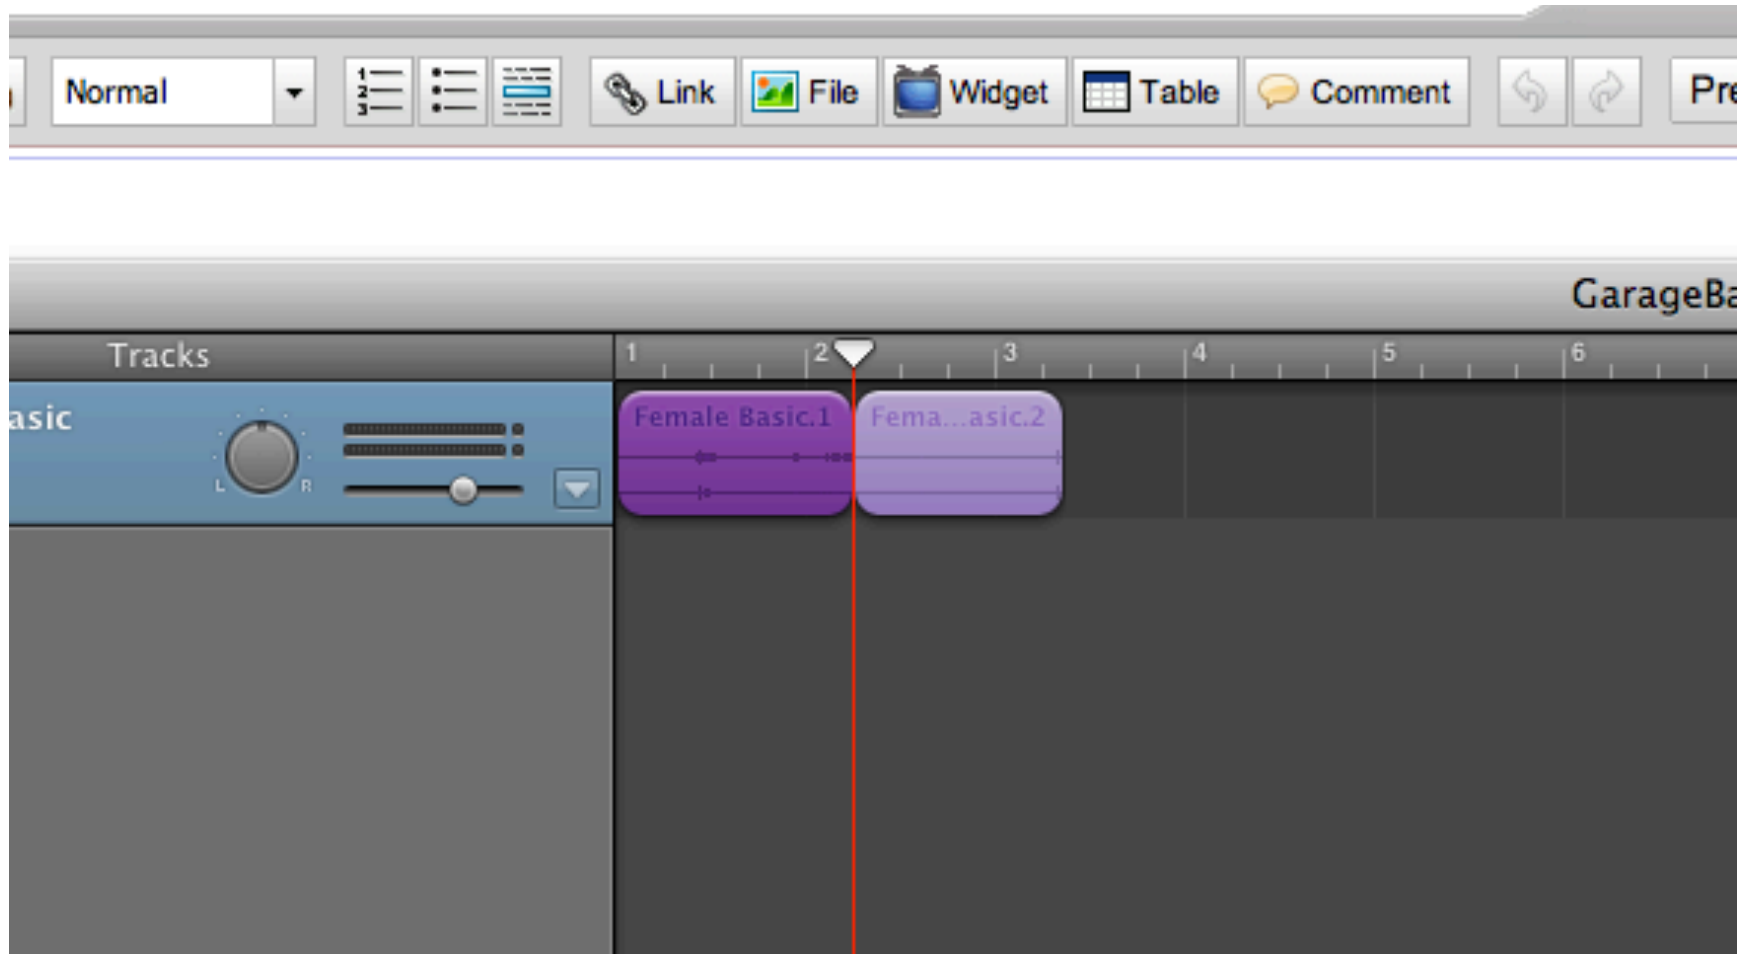

Successful

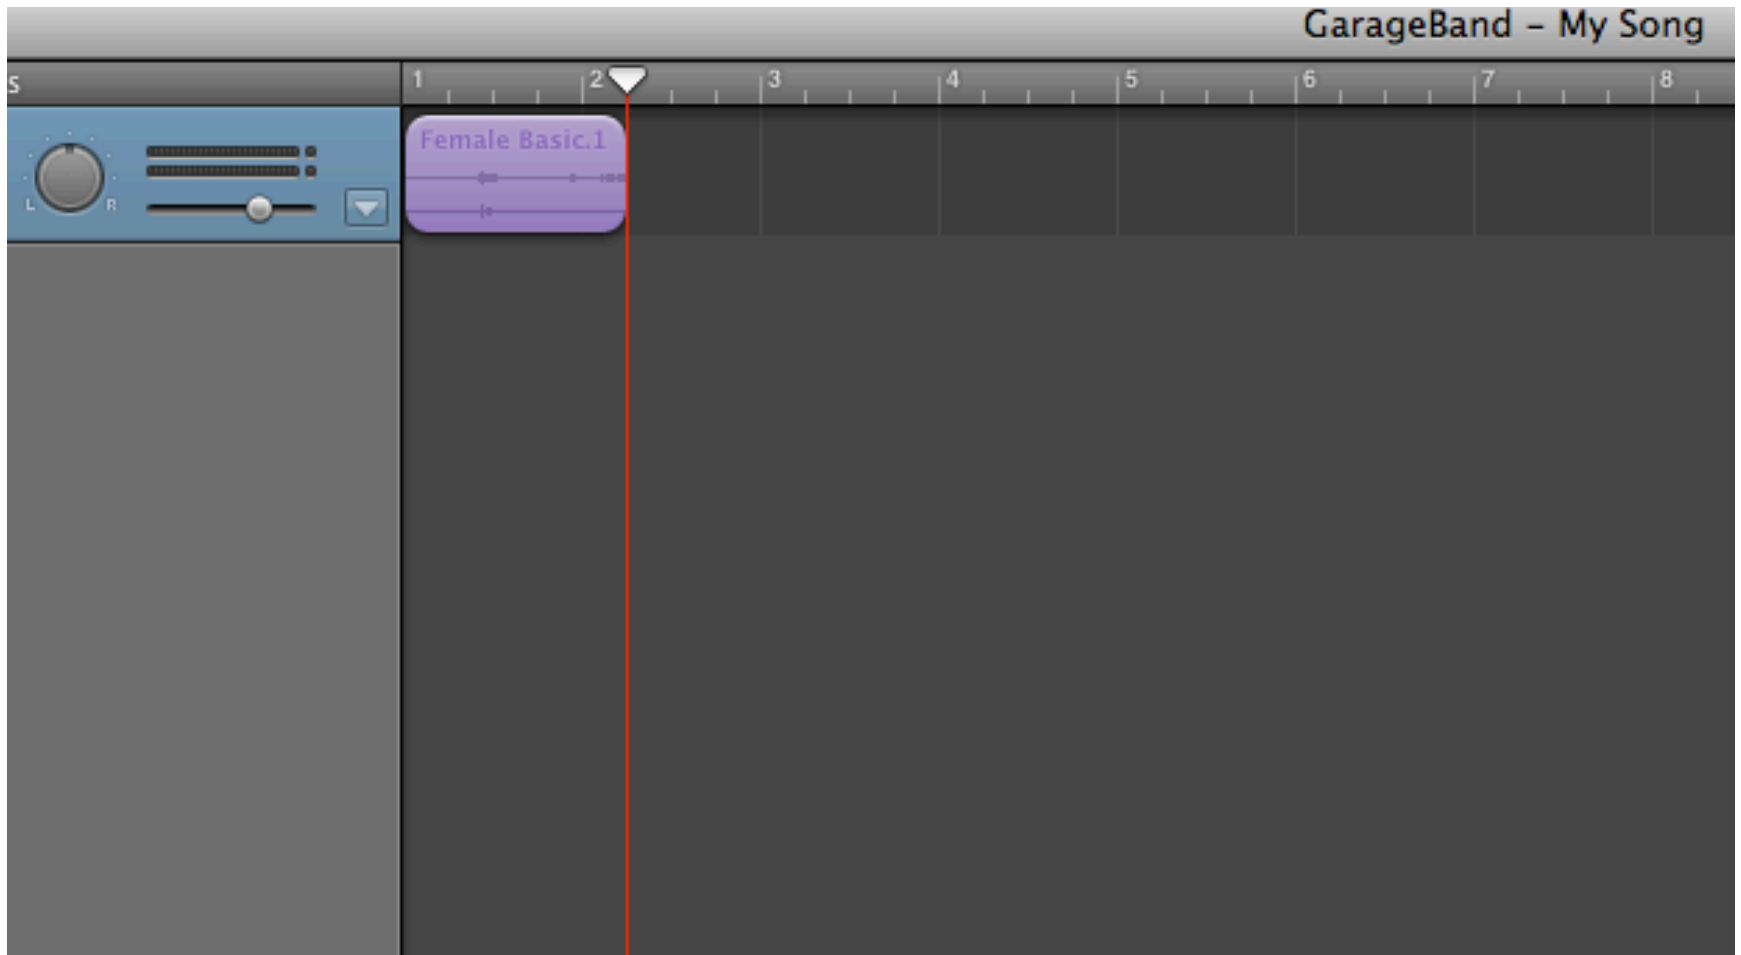

Put play head over area you want to adjust, then split. Play use spacebar

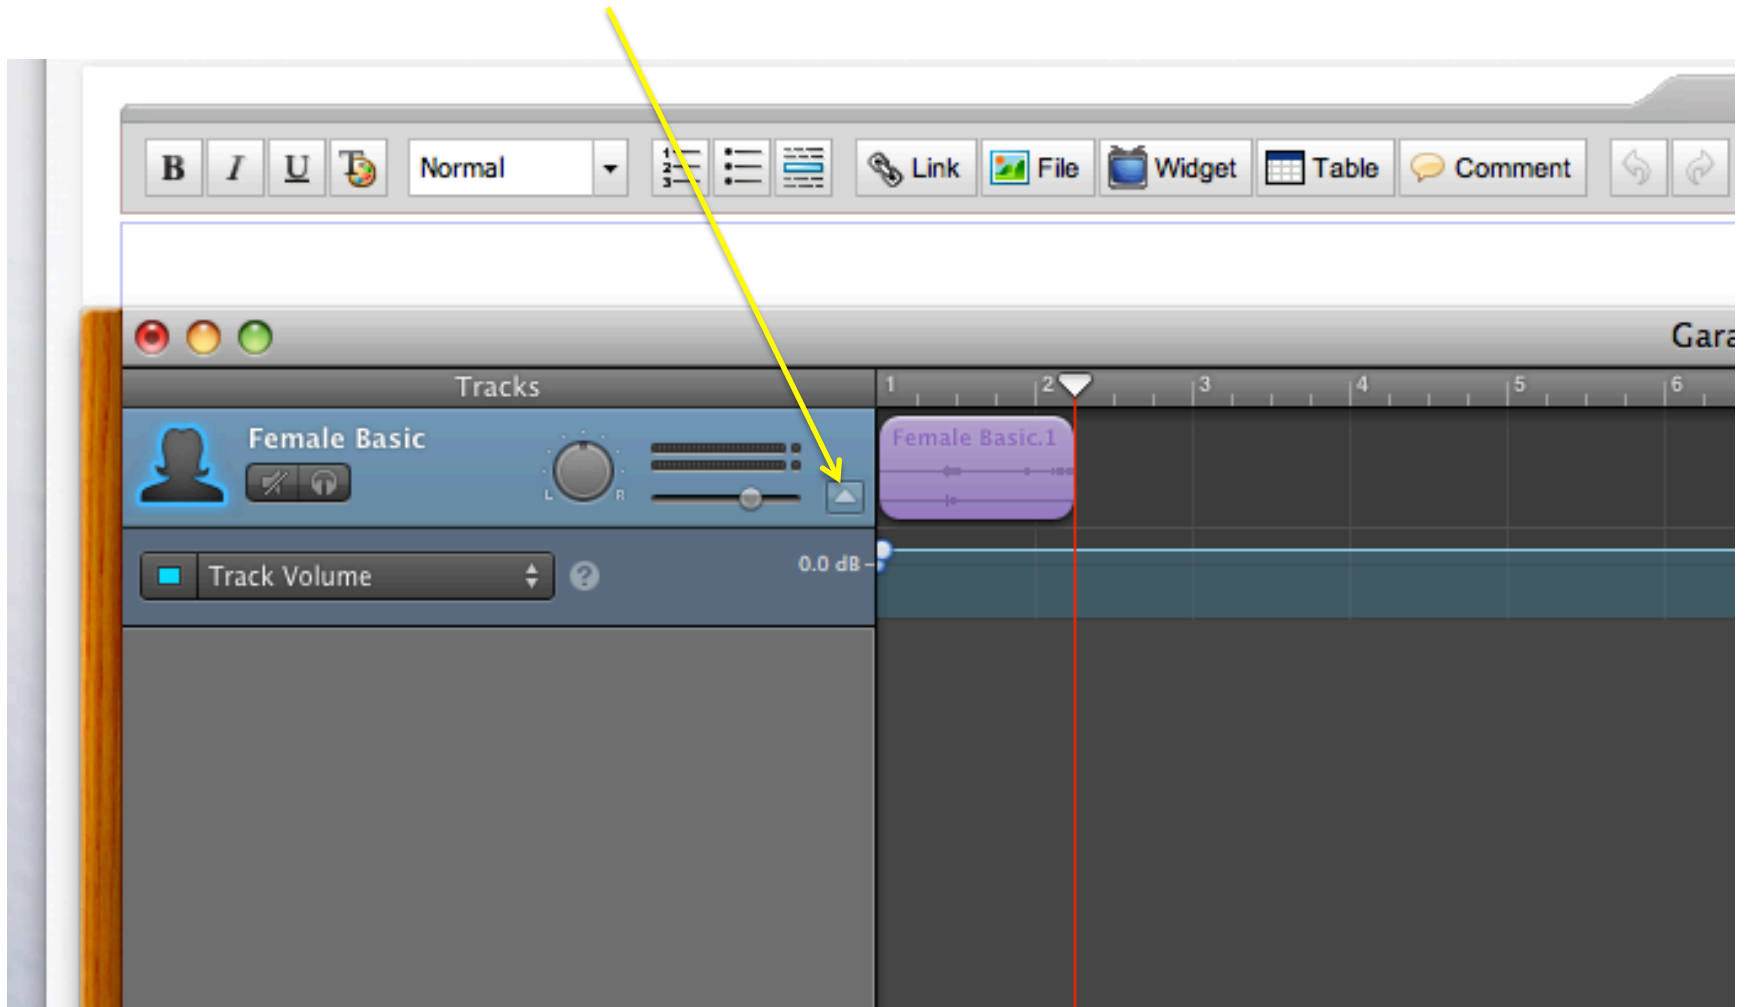

Split Track

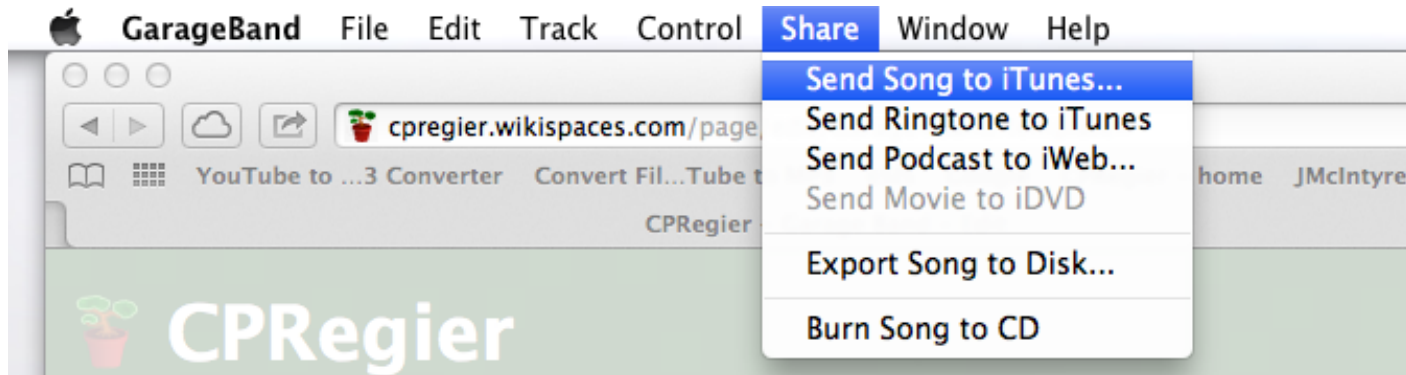

End removed

Track Volume adjustment

Audio Settings:

Ideal for music of all types. Download times are moderate. Details: AAC, 128kbps, Stereo, optimized for music and complex audio. Estimated Size: 2.9MB.

Itunes

Drag this onto your desktop

This is now in the format you need.

Now we can get it

The image shows a screenshot of the iMovie application interface. The top window, titled "Project - Genetics", displays a video timeline with several tracks. The video track contains clips from a movie, including a scene with a large crowd and a scene with a man in a suit. The audio track shows a waveform for the music "185 - Let's Stay Together (Chorus)". The bottom window, titled "Climate Chnage politics", shows a similar timeline with multiple video and audio tracks. The video track contains clips from various news and documentary sources, including "FRONTLINE" and "CLIMATE CHANGE". The audio track shows a waveform for the music "Let's Stay Together (Chorus)". On the right side of the bottom window, there is a "Music and Sound Effects" panel with a list of tracks and a search bar.
