

# Orientation assignment

## For Mr. Regier

The following assignment is designed to acquaint you with the facility that you will be working in for the next 5 months. Please feel free to move around the room and gather information required to complete the assignment.

Design a floor plan of the lab using appropriate scale on plain white paper.

Include all of the following

1. Doors
2. All stationary equipment in room 167 and room 169. Label all machines. i.e Table Saw, CNC, Router Table, drill press, band Saw, Hand tool locations, etc.
3. Fire exits and extinguishers.
4. Label computer locations.
5. Printer location
6. Room number

Speakers and anything else that you think is important

Put a small description of where you are to go in the event of a fire.

Why did you take this course? And what things are you looking forward to doing or accomplishing in this course?

I will be grading this, use color a ruler and take your time and complete all questions for good marks.
